TEXAS McCombs
The University of Texas at Austin
McCombs School of Business

Post Graduate Program
Artificial Intelligence and Machine Learning: Business Applications
Learning Schedule - July 2026

Great Learning
POWER AHEAD

Cohort Launch **11-July**

#	Module	Course	Content Release Date	Assessment Deadline	Mentored Learning Session Weekend
0	Pre-Work	Introduction to the World of Data and AI	*Available on enrollment*	-	20-Jun
		Python Programming Fundamentals	-		27-Jun
		Independence Day Break			
		Program Orientation	*Available on enrollment*	-	11-Jul
		Introduction to the World of Data and AI	-	-	11-Jul
		The Generative AI and Agentic AI Landscape	-	-	18-Jul
		Python Programming Fundamentals	*Available on enrollment*	19-Jul	19-Jul
	Claude-Based AI Workflows	The Claude Ecosystem	*Available on enrollment*	-	-
		Prompt Engineering with Claude Chat	*Available on enrollment*	-	-
		Claude Cowork and Agentic Workflows	*Available on enrollment*	-	-
		Building with Claude API	*Available on enrollment*	-	-
		Claude Code - Use Code Agents to Build Agents	*Available on enrollment*	-	-
		Performance and Cost Tradeoffs for Agentic AI in Production	*Available on enrollment*	-	-
1	Python for AI Solutions	Python Programming with Generative AI	*Available on enrollment*	26-Jul	25-Jul
		Data Manipulation and Exploratory Data Analysis	23-Jul	2-Aug	1-Aug
2	Predictive Modeling with Machine Learning and Neural Networks	Linear Regression	30-Jul	9-Aug	8-Aug
		Decision Trees	6-Aug	16-Aug	15-Aug
		K-means Clustering	13-Aug	23-Aug	22-Aug
		Ensemble Techniques	20-Aug	30-Aug	29-Aug
		Labor Day Break			
		Neural Networks	27-Aug	13-Sep	12-Sep
		Project 1	20-Aug	20-Sep	19-Sep
		Hackathon	**21-Sep**	**27-Sep**	-
3	Generative AI for Natural Language Processing	Large Language Models and Prompt Engineering	17-Sep	27-Sep	26-Sep
		Evaluating Generative AI Workflows	24-Sep	4-Oct	3-Oct
		Retrieval Augmented Generation	1-Oct	11-Oct	10-Oct
		Responsible AI	8-Oct	18-Oct	17-Oct
		Project-2	1-Oct	25-Oct	24-Oct
4	Agentic AI for Automation	Single-Agent Systems	22-Oct	1-Nov	31-Oct
		Diwali Break			
		Multi-Agent Systems	29-Oct	15-Nov	14-Nov
		Evaluating Agentic AI Systems	12-Nov	22-Nov	21-Nov
		Thanksgiving Break			
		Project-3	29-Oct	6-Dec	5-Dec
		Hackathon	**7-Dec**	**13-Dec**	-
5	Deploying AI Solutions	ML Model Deployment	3-Dec	13-Dec	12-Dec
		Deploying GenAI solutions	10-Dec	20-Dec	19-Dec
		Year-end Break			
		Project 4	3-Dec	10-Jan	9-Jan
6	Multimodal GenAI	*Post module 5*		-	16-Jan
7	Neural Networks for Computer Vision	*Post module 5*		-	-
8	Statistical Learning	*Post module 5*		-	-
9	Recommendation Systems	*Post module 5*		-	-
10	Introduction to SQL	*Post module 5*		-	-

1 This schedule might change in the future as and when the design of the program is improved upon.
2 The assessment deadlines here mean the end of the day. The exact time will vary for different time zones.
3 Assessment here could mean either a quiz or a project.
4 Hackathons are optional, non-graded, and fun learning competitions.
